A GLOBAL PLAYER IN THE SHIP & PLANT BUSINESS

“We’ll continue to stand in the forefront to lead ship business and activity participate in all the project areas”

SHIP & PLANT

Hyundai Corporation, with its global ship-marketing network, has greatly contributed to Korea's status as a global player in the shipbuilding industry by supplying over 1,000 ships worldwide through cooperation with Korea's major shipbuilders such as Hyundai Heavy Industries and others.

Hyundai Corporation will continue to stand in the forefront to lead the domestic ship exportation of megaton level vessels ranging from oil tankers, container liners to LNG carriers and also of small to medium sized ships such as petroleum products carriers, feeder containers and tug supply vessels, utilizing its accumulated marketing know-how and global sales network.

Moreover, the company will continue to further create businesses in fields such as ship repairing, remodeling, used vessel trading, vessel material exporting, financing and intermediary trading. Especially, we are recently expanding our business activities into rapidly developing shipbuilding countries such as Vietnam and China, for package deals providing engineering and supervision coupled with ensuing consulting activities and acquisition and operation of shipyards.

The Plant business unit handles major facilities such as power plants, petrochemical plants, gas treatment facilities, freshwater facilities, environmental facilities, undersea pipelines, small to medium sized facilities and infrastructure projects. In cooperation with leading global plant construction companies, the unit executes turnkey projects for project owners, developers or operators by providing services in areas such as design, materials supply, construction, installation and test operation. The unit also supplies a wide variety of materials by subcontracting with EPC contractors.

Hyundai Corporation is actively participating in all the project areas including marketing, project organizing, design & manufacturing, procurement, construction and testing; and also financing arrangement and off taking where the customer requires support as well.

MAJOR PRODUCTS

SHIP

COMMERCIAL VESSELS

- LNG Carrier
- LPG Carrier
- ULCC
- VLCC
- SUEZMAX Tanker
- AFRAMAX Tanker
- LR/MR Product Tanker

A TOP CLASS SPECIALIZED ORGANIZER

“Will devote the best effort to overcome challenging business conditions and ensure successful business.”

ELECTRICAL SYSTEM & MACHINERY

The Electrical System & Machinery business unit handles automotive plant & machinery, general machinery, construction equipment, power generation equipment, port loading & unloading equipment, small-sized industrial plants, electrical equipment, steel tower, etc.

In collaboration with specialized major manufacturers, the unit provides diversified services such as supply of machinery and equipment, provision of complex transaction services requiring financing support and also performance of turnkey-based projects, which include engineering assistance, logistics, installation and supervision.

Hyundai Corporation, as a top class specialized organizer in the Electrical System & Machinery field, will devote the best efforts in creating high-value by strengthening its project developer role, and its abilities and professional sales activities in each product and region.

MAJOR PRODUCTS

INDUSTRIAL MACHINERY AND EQUIPMENT

- Automobile Concept Engineering
- Automobile Body Shop Equipment
- Automobile Assembly Shop Equipment
- Automobile Paint Shop Equipment
- Excavator/Wheel Loader
- Automated Material Handling System
- Press
- Conveyor System
- Stamping & Tools
- Jig & Fixture
- Robot
- Industrial Machinery
- Agricultural Equipment
- Machining Center
- Education Equipment
- Crane
- Hospital Equipment

ELECTRICAL EQUIPMENT

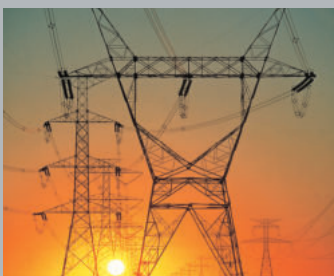

- Transformer
- Switchgear
- Elevator & Escalator, Moving Walkways
- M.V. & L.V. Circuit Breaker
- Gas Insulated Switchgear
- Motor
- Generator
- Electrical Equipment for Substation
- Steel Tower
- Cable

PROCESS PLANT & EQUIPMENTS

- Exor-I RFCC Reactor
- Ninth Sasol Reactor
- EO/EG Plant EO Reactor
- Hyundai Petrochemical 200,000 TPY EO/EG Plant
- Sohar, RFCC Regenerator
- Madero Refinery HDT Reactor
- PE Solution Absorber (Multiwall)
- Tuban Olefin Plant Xylene Column
- Ethylene Plant Propylene Fractionator
- BTX Plant No.1 Xylene Column
- NCC Quench Tower
- Ethylene Plant C2 Splitter
- Gori Nuclear Unit 5 & 6 steam Surface Condenser
- Al-Taweelah 'B'
- No.2. NCC Furnace
- KSTAR Vacuum Vessel
- KSTAR Cryostat

POWER GENERATION EQUIPMENT

- Steam Generator
- Heat Recovery Steam Generator
- Utility Boiler
- Diesel Engine
- Packaged Power Generation
- Co-generation Power Plant
- Combine Cycle Power Plant

**PAVING THE WAY TO CREATE
NEW BUSINESS**

"We're driving and supplying diversified services and proper products in the various businesses"

AUTOMOBILE & ROLLING STOCKS

Hyundai Corporation's Automobile Division handles such items as; passenger car, commercial vehicle, military vehicle, various special purpose vehicles, engine, automobile parts, rolling stocks and railway equipments. Hyundai Corporation is in collaboration with not only Hyundai Motor company and Kia Motors Corporation but also various special purpose vehicle manufacturers.

Also, Automobile Division is very active in developing new business such as triangular trade, overseas assembly project as well as export. In addition, we are driving forward various businesses by providing financing support including Export Loan, Short-term Trade Finance, EDCF and Relending Facility in close cooperation with Korean Export Credit Agencies.

Automobile Division's diversified services are based on the efficient technologies and know-how to meet the requirements of the clients by the strategic alliances with reliable manufacturers and proper financing arrangements in order to enhance the satisfaction and benefits of the clients.

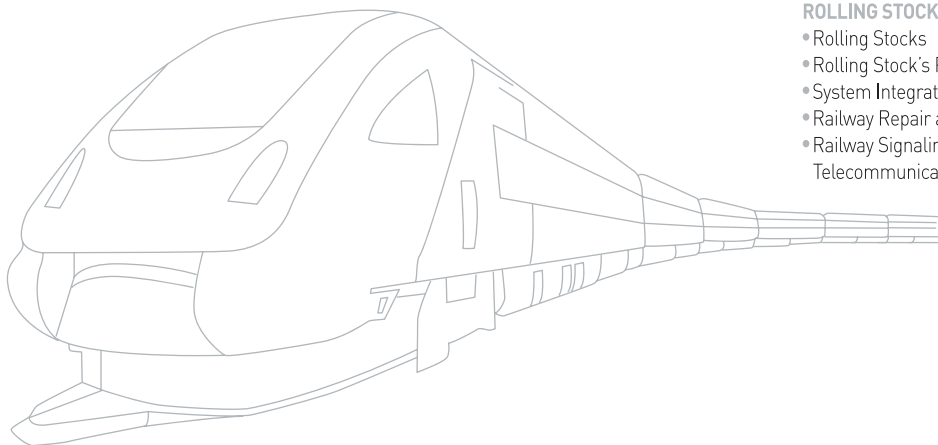

MAJOR PRODUCTS

AUTOMOBILES

- Passenger Car
- Commercial Vehicles
- Military & Special Purpose Vehicles
- Automobiles CKD & Parts

ROLLING STOCKS & RAILWAY

- Rolling Stocks
- Rolling Stock's Parts and System
- System Integration
- Railway Repair and Maintenance Equipment
- Railway Signaling and Telecommunication System

A STRONG PROFESSIONAL GROUP IN THE STEEL INDUSTRY

“We’re leading to successful steel business with our capabilities
of business know-how and overseas marketing”

STEEL & METAL

The Steel Division supplies a variety of steel and metal products including flat & long products, pipes, stainless steel, and nonferrous metals by export, import and intermediary or "trilateral trade". The Division is exerting its best efforts to create a constant growth engine through extension of its business domain to secure a stable income source and improve the business structure. For example, the Division invested to establish coil centers in India and also advanced into construction materials leasing business.

The Division is equipped with capabilities to accurately forecast the market and swiftly respond to market changes through its employment of the group of specialists around the world, and their extensive experience and knowledge. This enables effective mediation and distribution of products manufactured by leading domestic companies such as POSCO, Hyundai Steel. The Division is also strengthening its role of cooperating with and supporting small to medium-sized companies which lack sufficient overseas marketing ability. Moreover, to diversify revenue structure, the Division is actively developing intermediary trade, or "trilateral trade" involving both sellers and buyers outside Korea, for example by exporting Chinese pipes to the United States. The Division also imports steel plates, hot-rolled coils, slabs, other steel products and Nonferrous metals for domestic demand.

MAJOR PRODUCTS

FLAT PRODUCTS

- Hot Rolled Steel (HR, HRPO)
- Steel Plates
- Cold Rolled Steel (CR)
- Galvanized Steel (GI, EG)
- Pre-painted Galvanized Steel (PPGI)
- Tin Plate (TP)
- Electrical Steel (NO, GO)
- Other Flat Steel Products

LONG PRODUCTS

- Wide Frange Beams
- Angle
- Channel
- Sheet Pile
- Deformed Steel Bar
- Round Bar
- Wire Rod & Others

PIPE & TUBES

- Electric Resistance Welded Steel Pipes
- Submerged Arc Welded Steel Pipes
 - Longitudinal or Spiral Weld Seam Type
- Stainless Pipes

STAINLESS STEEL PRODUCTS

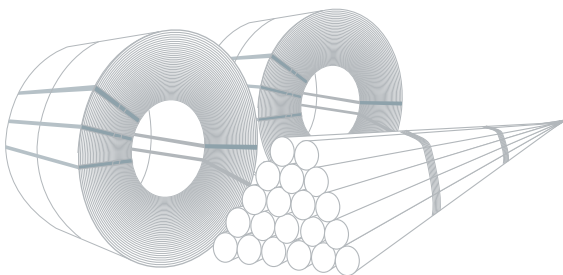

- Stainless HR Plate
- Stainless CR(BA Finish)
- Stainless CR(2B/Hair line Finish)

RAW MATERIALS & SEMI PRODUCTS

- Billet
- Slab
- Pig Iron
- Scrap

NONFERROUS METALS

- Aluminum Product
- Copper Products
- Zinc/Lead Products
- Coin & Bank Notes & Others

A LEADER OF HIGH-TECH DIGITAL ENVIRONMENT

"We will advance the future of high-tech digital goods by exerting every effort to create new business."

BRAND BUSINESS

The Brand Licensing Division is one of Hyundai Corporation's core businesses.

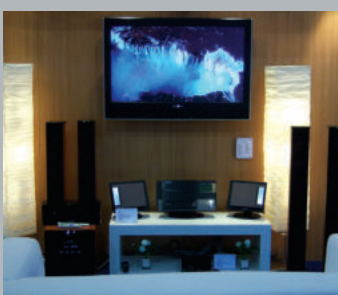

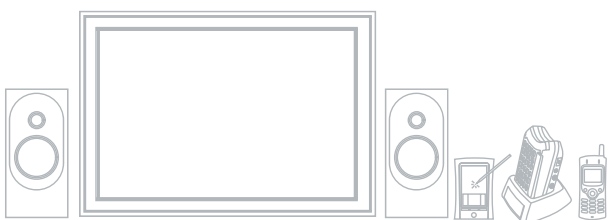

The Brand Licensing Division actively promotes the international sales and manufacture of products bearing the 'HYUNDAI' brand through its cultivation of a growing network of professional dealer around the world.

Since 2002, the Brand Licensing Division has significantly increased sales volume through the accumulation of a broad range of business know-how.

To enhance the value of 'HYUNDAI' brand, the Brand Licensing Division participates in several international exhibitions and trade show, such as CES, IFA, Hong Kong Electronics Fair, Canton Fair and others. In addition, the Brand Licensing Division frequently holds Regional Dealer Conferences to strengthen solidarity among dealers and to facilitate their exchange of ideas, information and experiences.

Hyundai Corporation's Brand Licensing Division will continue to exert its best efforts to enhance the 'HYUNDAI' brand through High-tech digital and consumer electronics manufacturers and dealers.

INTERNATIONAL FAIR

TRADING & DISTRIBUTION

A LONG-TERM BUSINESS PARTNER FOR ALL ITEMS

“By utilizing our overseas network, we’ll make efforts to develop new items and supply all general products”

PETROLEUM PRODUCTS & CHEMICAL

The Chemical division supplies petroleum products & chemical such as gasoline, gas oil, jet, fuel oil, naphtha, synthetic resin, synthetic rubber, and chemical fertilizers, etc. to clients all over the world through its global network. (The division also has the resources to secure a steady supply of intermediary products such as olefins and aromatics which are produced from naphtha.)

The Chemical division will steadily expand exports to China, South-East Asia and Africa by utilizing our overseas network to the fullest and focus on making greater inroads into Europe. As a part of the company's comprehensive strategy, the division will continue to increase exports by developing new items and executing aggressive marketing. In the process, Hyundai will base its activities on long-term business relationship with clients rather than immediate gains.

MAJOR PRODUCTS

MONOMER

- Propylene, Benzene, Butadiene, Toluene, Mixed Xylene, Paraxylene, Vinyl Chloride Monomer, Ortho Xylene, Styrene Monomer, C5, C9

POLYMER

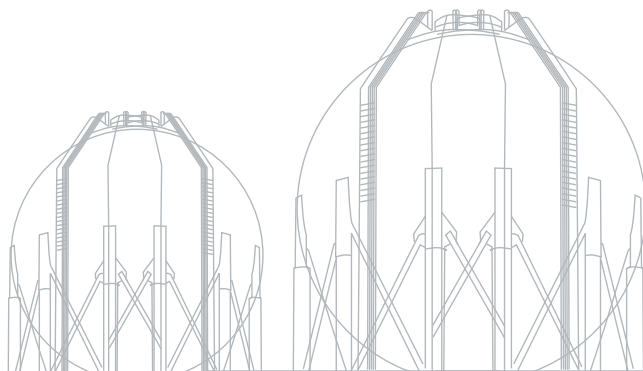

- Polyethylene(PE), PP (Polypropylene), Polyethylene Terephthalate(PET), Phthalic Anhydride(PA), Polyvinyl chloride(PVC), Polystyrene(PS), DOP, DOTP, Sodium Cyanide, Butyl Rubber

PETROLEUM PRODUCT

- Gasoline, Naphtha, Gas Oil, Jet/Kero, Fuel oil(AIR Bunkering&Marine Bunkering), Asphalt

INORGANIC CHEMISTRY

- Fertilizer (NPK, DAP, Urea, Amsul, Sulfuric, Ammonia)

Think Green Energy— Think Solar and Wind

We help the environment go green,
but we can help your business even more

SOLAR ENERGY & WIND POWER

Hyundai Corporation's Solar Energy Team mainly handles photovoltaic modules and inverters, and other subsequent photovoltaic products. In collaboration with skillful and fully experienced solar products manufacturer such as Hyundai Heavy Industries, the Solar Energy Team supplies photovoltaic products all over the world. In addition to supplying solar products, the Solar Energy Team also manages all stages of solar project management, from the tender stage to the completion of warranty service.

Our Wind Power Team provides a total solution to wind power customers around the globe. Hyundai Corporation can supply on- and off-shore wind turbines, manage installation, inspection, and carry out O&M with industry-leading partners such as Hyundai Heavy Industries and others. Wind Power Team delivers the most successful, predictable and competitive cash flows that clients seek through its relentless commitment to wind power expertise.

By focusing some of its most talented professionals on the growing renewable energy market, Hyundai Corporation greatly contributes to renewable energy market only to provide economical and profitable solutions for its customers, but also to help
